

# STERIDOSE

Kills  
99.999%  
of bacteria

## Hospitality Steriliser

You want to maintain an excellent standard of hygiene throughout your business, but what about the cups and glasses? Using Steridose will sanitise and sterilise to ensure customer satisfaction and safety.

This instruction card will show you simply how to use Steridose for all your hospitality sterilising needs.

1

You sanitise the hotel room to a high standard, but what about the cups and glasses?

2

Collect the dirty cups and glasses and take them to the washroom.

3

Fill the sink with either cold or warm water. DO NOT use boiling water!

4

Now add 1 Steridose tablet to the sink, you will be able to see it dissolve.

Submerge the cups and glasses and allow to soak for 5 minutes\*. There is no need to observe this process.

After soaking inspect the glasses and cups, then rinse under cold water.

Dry the glasses and cups, they are now sanitised and sterile. They can now be placed back in the room.

That's it! Any questions or further assistance you need? Call our customer service line.

\* If there is a need for virus removal allow to soak for 15 minutes. However 1 Steridose tablet to 2 litres of water with 5 minutes soaking will kill 99.999% of bacteria.

**STERIDose**  
Hospitality Steriliser

Thank you for learning about how to use Steridose, the one dose tablet for all your hospitality sterilisation requirements.

1 Tablet - 2 ltr Water
